Hi Shayne,

The "Property" for us is the Harbor Area and marine bedlands within the "Initial Study Area – Sediments." Everything upland is not owned by Washington State and is not managed by DNR, therefore it is not considered the "Property" for us. To more specifically answer your question, your answers will not include records, information, and data related to the Sesko's property and/or the property of other adjacent private landowners.

Subject: 104E Request

I wanted to ensure we are crystal clear on the definition of "affiliated". Have we created the list of properties requested in Question #4? I wanted to confirm whether this include Sesko's and/or other adjacent upland landowners. The answer to this question will significantly impact level of work that will need to be done.

I understand information request applying to parcels we manage but I find it somewhat unrealistic that EPA would wish us to review documents they have provided and then ask us to categorize each document according to questions asked about parcels DNR does not and has not managed in any capacity. If that is the case then so be it but I want this to be quite clear before I undertake this work.

Let's discuss tomorrow afternoon.

Thanks!

4. Identify each and every Property that Respondent currently owns, leases, operates on, or otherwise is affiliated or historically has owned, leased, operated on, or otherwise been affiliated with within the Investigation Area during the period of investigation (1930 – Present). Please note that this question includes any aquatic lands owned or leased by Respondent.
